---

Professional Summary

DevOps Engineer and Certified Kubernetes Administrator (**CKA**) with 1 year of hands-on experience in **AWS**, **Kubernetes**, **Terraform**, **CI/CD**, Monitoring, and **GitOps**. Delivered measurable improvements including 40% less manual deployment effort and 50% faster release cycles.

Certifications

Certified Kubernetes Administrator (CKA) – The Linux Foundation | Issued: Mar 2026

Work Experience

Freelance DevOps Engineer | May 2026 – Present

- Engineered and implemented a production-grade backup and disaster recovery (DR) solution for a Node.js/MongoDB application.
- Automated encrypted MongoDB backups to Amazon S3 using Percona Backup for MongoDB (PBM), enabling Point-in-Time Recovery (PITR).
- Built a Prometheus, Loki, and Grafana observability stack with custom dashboards and automated Telegram alerting for 3 services, enabling near real-time incident detection.
- Migrated product image storage to Amazon S3 with CDN delivery to improve asset loading performance and scalability reducing asset load time by 50**%.**

DevOps Intern – Zikola Agency | May 2026 – Jun 2026

- Executed cloud infrastructure, CI/CD pipelines, and deployment operations.

Cloud Computing Intern – Global Brands Group | Feb 2026 – May 2026

- Architected and implemented a Hub-and-Spoke AWS network architecture to connect and manage distributed cloud environments connecting 3 VPCs.
- Performed cloud migration activities, provisioning and configuring AWS resources including VPC, EC2, IAM, and S3.

DevOps Trainee – Digital Egypt Pioneers Initiative | Jun 2025 – Dec 2025

- Developed and deployed containerized applications using Docker and Kubernetes for cloud native environments.
- Orchestrated CI/CD pipelines using automation tools, reducing release cycle time by 50%**.**
- Established Prometheus and Grafana monitoring to track application and infrastructure performance.
- Collaborated with a 5-member team to design and implement a full DevOps solution.

Technical Skills

- **Cloud:** AWS (EC2, S3, VPC, EKS, CloudFormation, Cloud Engineering, Cloud Operations) .
- **Infrastructure as a Code:** Terraform, Ansible.
- **Containers & Orchestration:** Docker, Kubernetes (Helm, RBAC, Ingress, Autoscaling) .
- **Version Control:** Git, GitHub
- **Security & DevSecOps:** IAM, Trivy, Sealed Secrets, Container Security.
- **CI/CD & Release:** Jenkins, GitHub Actions, ArgoCD, GitOps, Release Automation.
- **Monitoring & Incident Response:** Prometheus, Grafana, CloudWatch, Loki, Incident Response.
- **Programming:** Python, Bash.
- **OS:** Linux, Linux Administration, Ubuntu, CentOS, RHEL, Debian, Windows Server.

Projects

Automated CI/CD & GitOps Deployment on AWS (EKS)

- Built and provisioned AWS infrastructure using Terraform across networking and cloud resources.
- Configured a Jenkins master-agent architecture and automated setup using Ansible.
- Implemented GitOps-based Kubernetes deployments using ArgoCD to manage deployments across 4 microservices.
- Integrated Prometheus and CloudWatch monitoring to provide centralized infrastructure and application visibility.
- Enabled Cluster Autoscaler for cost optimization, improving resource utilization by 35%.
- GitHub: github.com/abeerseada/depi-gp

Education

Bachelor's Degree in Computer Science – Mansoura University | Sep 2022 – Jul 2026

Leadership & Volunteer Experience

Vice Mentor – DevOps & Cloud Circle, LimitX MU | Feb 2025 – Feb 2026

- Mentored 10+ students in DevOps and Cloud fundamentals through hands-on technical guidance.
- Conducted 20+ hands-on labs and technical sessions covering DevOps and Cloud concepts.

Languages

- Arabic – Native
- English – Fluent (Professional Working Proficiency)
- German – A2 (Basic Professional Proficiency)
